Experience

MyZone myzone.com

Dec 2021 to Present

Backend Developer Vancouver, Canada

Technologies:

PHP, Symfony, ElasticSearch, RabbitMQ, Docker, Kibana

Key contributions:

- Developed new features in ERP system integrated with Hubspot and Avesdo API's offering customers an option to rent or buy new apartments
- Maintaining internal time tracking application, providing new features for generated reports at the end of the month

Organic Ecommerce Ltd organicecommerce.com

Jan 2020 to Dec 2021

Software Developer Worcester, United Kingdom

Technologies:

PHP, Magento, Wordpress, Laravel, Nova, MySQL, Google Cloud, Javascript, Vue, jQuery

Key contributions:

- Developed JSON API which is behaving as a middleware between ERP system and third party software using Magento's ecommerce logic to process orders, payments, etc.
- Planned, designed and developed software to control and manage energy and emissions, allowing building managers to analyze and eliminate wasted energy through rich content of Laravel/Nova dashboard
- Energy quotation system built on top of Wordpress platform offering customers to calculate and order tariff with renewable source of electricity

Imel imel.ba

Jan 2017 to Jan 2020

Software Developer Lukavac, Bosnia and Herzegovina

Technologies:

PHP, Laravel, Symfony, Pimcore, Shopware, Wordpress, Javascript, AngularJS1.6, jQuery, MySQL, Docker, Git

Key contributions:

- Developing web application used to manage and track worker time, vacation days and leaving an option for remote check in/out. Application is used in various companies as internal evidention system also using the benefits of easy one-click generated monthly or yearly reports
- Performing technical analyses of new features for web application which is used to generate licence codes for every company's software and making sure it is secure process
- Created a fully automated service with ability to synchronize ecommerce data from ERP system to our Wordpress platform
- Analyze data, troubleshoot code issues and identify areas for improvement on Pimcore and Shopware platforms while delivering smooth ecommerce solutions
- Building Docker based development environment for 2 of our major projects resulting in easier project setup and faster deployment
